ABOUT ME

I am a 8th semester scheduled to graduate this year student in the Applied Bachelor's Program of Informatics Engineering at the State Polytechnic of Jember. I possess a solid understanding of various programming languages, database management, and the Microsoft Office suite. My qualifications are supported by certifications and awards, including TOEFL, Data Science, and Application Design, which demonstrate my creativity and technical proficiency. I am particularly interested in contributing to the fields of software development, quality assurance, and data analysis. With a proven ability to adapt to new environments, collaborate effectively within teams, and communicate actively, I aim to bring innovative solutions to the dynamic world of information technology. My goal is to continuously enhance my expertise and stay updated with the latest advancements in the IT industry..
